

DNA: Quality Assurance

Quality program

The Sacramento County District Attorney Laboratory of Forensic Services provides its customers access to DNA typing results of selected biological materials associated with investigations.

To that end, the DNA program ensures the quality, integrity, and accuracy of its data and presentation by adhering to the laboratory's Quality Program.

Laboratory's quality program

For information on the procedures used to assure the quality of analyses and results, refer to the laboratory's *Quality Manual*.

Authority

QAS
5.2.3.1.1
5.2.3.1.2

The Technical lead is responsible for overseeing the technical operations of the DNA section. If a quality issue warrants it, the Technical Lead has the authority to initiate, suspend, and resume DNA operations for the laboratory or an individual.
